DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 26-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 26 and 28 recite "a valve member" and "a piston" which appear to be double inclusions of the "hydraulic amplifier arrangement," i.e., the "valve member" and the "piston" appear to be sub elements of the hydraulic amplifier arrangement.

3. Claims 26-28 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: structural elements which enable the functional recitation "...mechanically coupled by the hydraulic amplifier arrangement during application of the initial retracting force and decoupled from one another during application of the second retracting force." The function recitation is not commensurate in scope with the structural elements claimed. It appears that applicant is claiming what his invention does rather than what it is.

Claim Rejections - 35 USC § 102

Art Unit: 3752

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Boecking (WO 00/11339).

Boecking discloses a fuel injector comprising: a valve member 6; a piston member 3; an actuator (valve actuation unit, column 5, line 9).

Boecking discloses an initial retracting force (S max) and a second retracting force (S small).

Even if applicant believes that Boecking fails to disclose the functional recitation "...mechanically coupled by the hydraulic amplifier arrangement during application of the initial retracting force and decoupled from one another during application of the second retracting force," the functional recitation considered to the extent that it merely requires the ability to so perform. It is suggested that the functional recitation be expressed as a "means" for performing a specified function, as set forth in 35 U.S.C. 112, 6th paragraph, in order to be given patentable weight.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 3752

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 26-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,776,354. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of '354 fully discloses the instant claimed subject matter.
